PACAPT1 USB Audio Capture

⚬ FEATURES

The PulseAudio PACAPT1 is a device that allows analog audio to be streamed or recorded, resulting in converted content that can be accessed on computers and other commonly found capture software locally and/or remotely. With today's changing world of virtual attendance, the PACAPT1 can be utilized for virtual learning, podcasts, or record live audio. Convert CDs, cassettes, vinyl records, etc. to an MP3 or digital audio format. Easy to install and connect, the PACAPT1 simply connects analog audio in the form of RCA or 3.5mm connections from an audio source which converts to USB, and can be connected to a computer with the software included. For simply converting analog audio to digital formats, the PACAPT1 is a perfect solution.

USB Audio Capture
⚬ Part # PACAPT1

- Allows the audio from any analog device to be streamed or recorded
