ADVANCED PERFORMANCE  
FIBER OPTIC CABLE

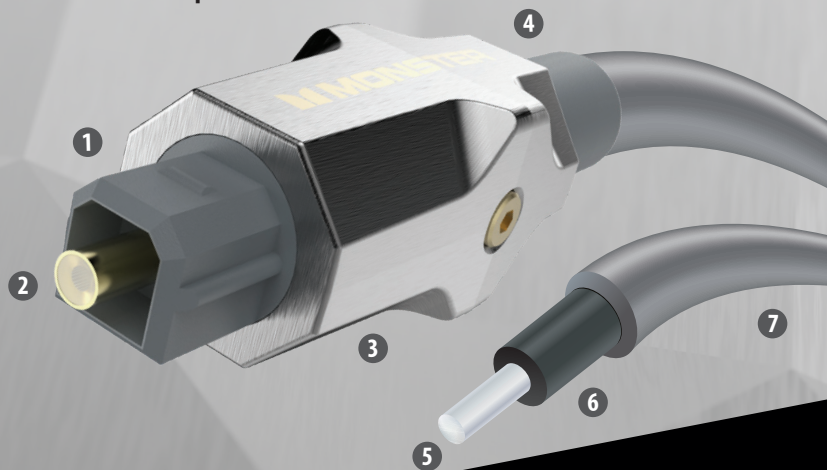

25.0 Gbps	VMM10013:	1.5 M/5 Ft
25.0 Gbps	VMM10014:	3 M/10 Ft

Fiber Optic Digital Audio Cables connect surround sound sources such as DVD players and cable/ satellite boxes, to home theater AV receivers.

Optical cables support a variety of multi-channel audio formats, including 5.1 Dolby® Digital, 5.1/7.1.

- 1 Heavy-Duty Molded Connectors**  
For long-lasting durability and performance
- 2 Precision-Polished Fiber Terminations**  
Minimize internal reflections for improved digital signal transfer
- 3 Metallic Multi-Faceted Main Housing**  
No-slip design allows easy connector handling
- 4 Heavy-Duty Strain Relief**  
Prevents fiber and connector damage during cable installation or removal
- 5 Specially Tuned Optical Fiber**  
Extra low-loss fiber for low dispersion and higher fidelity

- 6 InsuLight® Inner Jack**  
Reduces digital jitter and time distortion for more accurate audio reproduction
- 7 Duraflex® Protective Jacket**  
Flexible for easy routing and installation. Resistant to abrasions and temperature extremes
