

HDBaseT Extender Set with Wall-Plate Transmitter

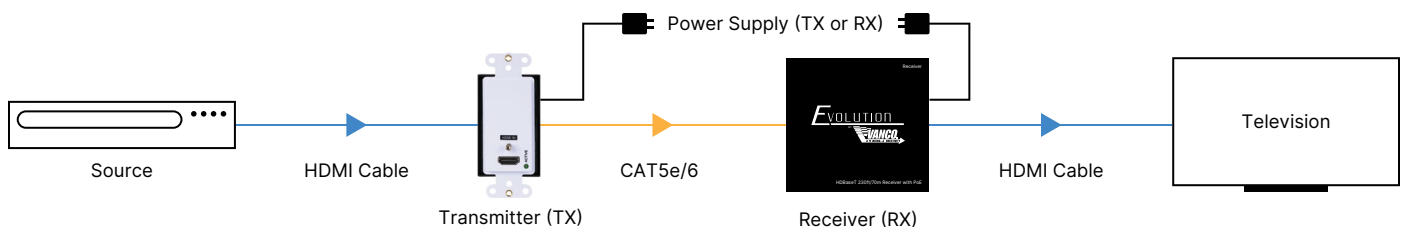

A wall-plate solution for extending HDMI signals using HDBaseT Technology for both residential and commercial installations.

The Evolution by Vanco [EVWP3000](#) HDBaseT extender with single-gang wall-plate transmitter supports resolutions up to 4K@60Hz, 4:4:4 chroma over a single Cat5e/6 cable up to 131ft (40m) or 1080p@60Hz up to 230ft (70m). Featuring HDBaseT technology, this extender set supports audio, video, IR, and Power over HDBaseT (PoH) that transmits power over the Cat5e/6 cable. The EVWP3000 is a great wall-plate solution for extending HDMI signals using HDBaseT technology for both residential and commercial installations.

Product features:

- Features HDBaseT technology that distributes uncompressed high-definition signals at twice the distance of HDMI cables
- Extends 1080p resolutions up to 230ft (70m) and 4K@60Hz resolutions up to 131ft (40m) over a single Cat5e/6 cable
- Transmits power over a single Cat5e/6 cable using Power over HDBaseT (PoH) technology that provides power to the transmitter or receiver without the need for an additional power supply
- HDCP compliant
- Includes auto equalization and EDID
- Supports LPCM 2/5.1/7.1CH, Dolby Digital, Dolby Digital Plus, DTS, DTS-HD audio formats
- Features bi-directional IR at 38KHz
- Includes a single-gang transmitter and wall mountable receiver
