

IR Kit and Remote for PAV140

DEAR CUSTOMER

Thank you for purchasing this product. For optimum performance and safety, please read these instructions carefully before connecting, operating or adjusting this product. Please keep this manual for future reference.

IR Remote

Input Selection - Choose between up to 3 inputs connected to the PAV140

- Input 1: Dual RCA audio input
- Input 2: 3.5mm audio input
- Input 3: Optical Digital audio input

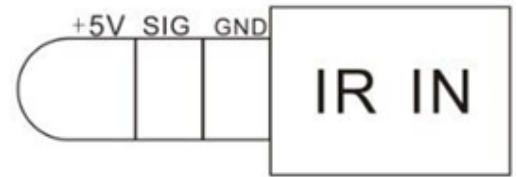

Mute Function - Mute and unmute inputs, outputs, and/or MIC volume

- MIC: Mute/unmute microphone volume
- Speaker: Mute/unmute speaker volume
- Line: Mute/unmute line in volume

Audio Control - control volume level as well as adjust bass and treble

- MIC: Adjust microphone volume
- Line: Adjust line in volume
- Bass: Adjust bass level
- Treble: Adjust treble level

IR Receiver Pin-Out

We recommend using only the IR receiver included in the PAV140-IR kit. Third party IR receivers may work, but cannot be guaranteed to function. Above is the pin-out of the IR receiver included in the PAV140-IR kit.

CONNECT AND OPERATE

Back Panel

- Connect the PAV140-IR IR receiver to the 3.5mm port (outlined in pink) on the back of the PAV140 amplifier.
- Place IR receiver at a location where it is line of sight so that the IR remote can send IR signals to it.
- The IR receiver also allows the PAV140 amplifier to be hidden, but still able to be controlled.
- To secure the IR receiver, use the included double-sided adhesive.
