

90 Degree Keystone Termination Tool

370465 Sales Sheet

The Vanco 90 Degree Keystone Termination Tool is a professional grade network installation tool built for speed and precision. Designed to punch down and trim all four pairs of Cat5e/Cat6 Ethernet cable in one smooth action, its rugged carbon steel body and adjustable cut height deliver consistent, clean terminations every time.

Key features:

- Works with compatible Cat5e and Cat6 keystone jacks
- Carbon Steel Body with alloyed steel blades
- Punches down and trims all 4 pairs at once
- Reduces punch down and cut time significantly
- Adjustable crimp and cut height
- Replaceable punch-down and cut module
- Retaining ring helps to keep the tool closed when not in use

Compatible keystones

The 90 Degree Keystone Termination Tool is specifically designed to work with Vanco 90 degree keystone inserts, ensuring fast, accurate terminations and consistent performance across every installation.
