

Vanco EVSW1040 4x1 HDMI Switch ELAN Driver
V1.0 rev20160407

Overview

This driver integrates a Vanco EVSW1040 4x1 HDMI Switch into your ELAN control system. The driver was created and tested on a gSC2 series controller using g!Viewer. To use this driver, add the driver to the system, and follow the setup.

Specification

This package includes the following:

- Compiled ELAN Driver (EVSW1040.EDRVC)
 - Controls hardware device.

SERIAL (RS-232) Connection

The driver communicates to and from the device through an SERIAL (RS-232) connection and must be connected in order for the driver to function.

Setup

1. Add the driver to the controller as a "Zone Controller" in g!Tools Configurator under the "Media" menu.
2. Add a new communication device, selecting "Serial Port" and the "COM Port" that the Switch is connected to.
3. Select the new communication device in the driver, and hit "Apply".
4. Configure the inputs under "Sources" and the output under "Zones".
5. Device specific commands (Contrast, Brightness, Color, and Sharpness) are available for event mapping. Device specific options (Mode, Resolution, and OSD) are available as options on output settings pages.
