

## IR Control Kit over HDMI

DEAR CUSTOMER

Thank you for purchasing this product. For optimum performance and safety, please read these instructions carefully before connecting, operating or adjusting this product. Please keep this manual for future reference.

### DESCRIPTION:

The 280701 is an IR over HDMI Kit that allows IR signals to be distributed from one display location to a source location. The source can be hidden and controlled as if they were right under the TV. The 280701 includes 1 IR emitter, 1 IR receiver, and 2 HDMI adapters. Simply connect the HDMI adapters to your source and display, connect the HDMI cable going from the source to the display, as well as the IR cables to the adapters and you are good to go! For the ability to place a source in a hidden location such as an equipment rack, while keeping the display location clean, the 280701 is the perfect solution.

### FEATURES:

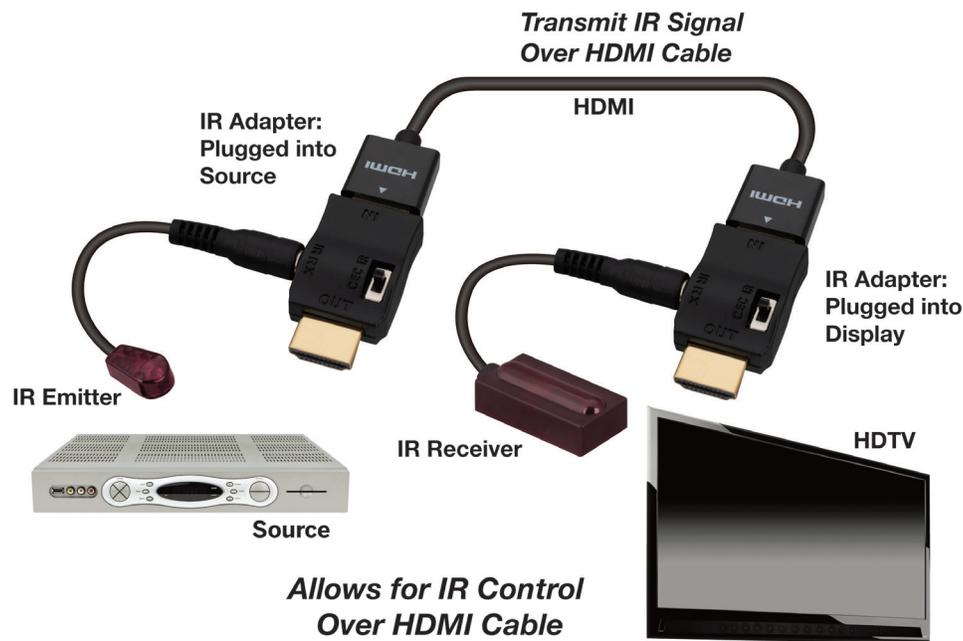

- Allows for IR signals to be passed through HDMI cable
- Connect the HDMI IR Adapters to each end of the HDMI cable, and then plug adapters into the source and display
- IR Emitter Pigtail connects to HDMI IR adapter at the source
- IR Receiver Pigtail connects to HDMI IR adapter at the display
- Extends IR Signals up to 100m/328 ft\*
- Supports Dual Band IR
- HDMI IR Adapters are IR or CEC configurable

*\*NOTE: Length rating dependent on quality of cable being used*

### PACKAGE CONTENTS:
