M1000[®]

ADVANCED PERFORMANCE
FIBER OPTIC CABLE

25.0 Gbps VMM10013: 1.5 M/5 Ft
25.0 Gbps VMM10014: 3 M/10 Ft

Fiber Optic Digital Audio Cables connect surround sound sources such as DVD players and cable/ satellite boxes, to home theater AV receivers.

Optical cables support a variety of multi-channel audio formats, including 5.1 Dolby[®] Digital, 5.1/7.1.

1 Heavy-Duty Molded Connectors

For long-lasting durability and performance

2 Precision-Polished Fiber Terminations

Minimize internal reflections for improved digital signal transfer

3 Metallic Multi-Faceted Main Housing

No-slip design allows easy connector handling

4 Heavy-Duty Strain Relief

Prevents fiber and connector damage during cable installation or removal

5 Specially Tuned Optical Fiber

Extra low-loss fiber for low dispersion and higher fidelity

6 InsuLight[®] Inner Jack

Reduces digital jitter and time distortion for more accurate audio reproduction

7 Duraflex[®] Protective Jacket

Flexible for easy routing and installation. Resistant to abrasions and temperature extremes
